Part 1  Tracing the Foundations

1  Graffiti on the Long Wall: A SodoTechnical Conversation
   Elayne Coakes, Dianne Willis and Raymond Lloyd-Jones .... 3

2  Tracing the Roots: The Influence of Socio-Technical Principles on Modern Organisational Change Practices
   Bjørn Erik Munkvold..................................................13
       2.1 Introduction..................................................13
       2.2 Socio-Technical Principles and Methodologies ..........14
       2.3 Organisational Design.......................................17
       2.4 IS Development and Implementation......................22
       2.5 Conclusion and Implications..............................24

Part 2  The Writing on the Wall

3  Technology and Freedom: A Socio-Technical Approach
   Enid Mumford..........................................................29
       3.1 Technical Progress............................................29
       3.2 Ideas on Freedom...............................................30
       3.3 Computers, Freedom and Work..............................31
       3.4 Information, Technology and Freedom.....................33
       3.5 Participation and Freedom..................................35
       3.6 Freedom, Participation and the Future...................37

4  Searching for New Grounds in STS: Beyond Open Systems Thinking
   Frans M. van Eijnatten and E.C. Lieke Hoogerwerf........... 39
       4.1 Introduction..................................................39
9 The Role of Socio-Technical Thinking in the Information Systems Curriculum in UK Universities
Brian Hopkins

9.1 Introduction
9.2 The Early Years
9.3 The Process of Reflection
9.4 The Continuing Struggle
9.5 Our Refusal to Engage
9.6 Lessons Learned
9.7 Future Prospects

10 Balancing at the Edge of Chaos in a Sociotechnical World
Kay Fielden

10.1 Introduction
10.2 The Learning Environment
10.3 Research Method
10.4 Sociotechnical Principles
10.5 Managing Change at the Edge of Chaos
10.6 The Importance of Initial Conditions
10.7 Participation
10.8 Control versus Self-Organising Systems
10.9 Seif and Others in Complex Human Activity Systems
10.10 Innovation in Education
10.11 Lessons Learned
10.12 Conclusion

Part 3 Re-Design

11 Group Dynamics Meet Cognition: Combining Socio-Technical Concepts and Usability Engineering in the Design of Information Systems
Andrew Dillon

11.1 Introduction
11.2 Usability Engineering
11.3 The Impact of Socio-Technical Theory on Information Technology Design
11.4 Developing Humanly Acceptable Information Systems
11.5 Reconciliation?
11.6 Lessons for Learning
11.7 Practical Hints and Tips
12 Enhancing IS Quality through Design-Based Documentation Production  
**David Tuffey** ......................................................... 126

12.1 Introduction ......................................................... 126
12.2 A Problem Observed ................................................. 127
12.3 IS Quality and Documentation ..................................... 130
12.4 Participation and User Satisfaction: The Need for "Integrative Processes" ............................................. 130
12.5 Bridging the Gap ....................................................... 131
12.6 A Solution to the Problem .......................................... 132
12.7 Summary .............................................................. 133

13 Design: A Better Way for Making Systems  
**John Nicholls** ............................................................. 134

13.1 Introduction ............................................................ 134
13.2 The Technical Basis of Computing ................................. 134
13.3 The Human Dimension ................................................ 136
13.4 The Case for Design .................................................. 136
13.5 History of Design ...................................................... 137
13.6 Systems Development as Design .................................... 140
13.7 Agenda for Research and Action .................................... 143
13.8 Summary .............................................................. 145

Part 4 Transforming the Long Wall

14 Information Systems Implementation and Organisational Change: A Socio-Technical Systems Approach  
**Margaret T. O'Hara, C. Bruce Kavan and Richard T. Watson** ................................................................. 149

14.1 Introduction ............................................................ 149
14.2 Organisational Change ............................................... 150
14.3 Some Illustrative Cases ................................................. 152
14.4 Managerial Implications ............................................. 155
14.5 Hints and Tips .......................................................... 158
14.6 Conclusion .............................................................. 158

15 Virtual Dynamics and Socio-Technical Systems  
**Eliat Aram** ............................................................... 160

15.1 Introduction ............................................................ 160
15.2 Networking Technologies and the Individual ...................... 161
15.3 Networking Technologies and the Group .......................... 163
15.4 Networking Technologies and the System as a Whole: The Paradox of the Primary Task ...................... 167
15.5 Conclusion .............................................................. 169
