

CONTENTS OF VOLUME 1A

Introduction to the Series	v
Contents of the Handbook	vii
Preface	ix
CORPORATE FINANCE	
<i>Chapter 1</i>	
Corporate Governance and Control	
MARCO BECHT, PATRICK BOLTON and AILSA ROELL	1
Abstract	3
Keywords	3
1. Introduction	4
2. Historical origins: a brief sketch	5
2.1. How representative is corporate government?	->
2.2. Whom should corporate government represent?	7
3. Why corporate governance is currently such a prominent issue	7
3.1. The world-wide privatization wave	8
3.2. Pension funds and active investors	y
3.3. Mergers and takeovers	--
3.4. Deregulation and capital market integration	^
3.5. The 1998 Russia/East Asia/Brazil crisis	12
3.6. Scandals and failures at major USA corporations	13
4. Conceptual framework	^
4.1. Agency and contracting	iii
4.2. Ex-ante and ex-post efficiency	13
4.3. Shareholder value	*4
4.4. Incomplete contracts and multiple constituencies	14
4.5. Why do we need regulation?	17
4.6. Dispersed ownership	17
4.7. Summary and conclusion	17
5. Models	19
5.1. Takeover models	19
5.2. Blockholder models	24
5.3. Delegated monitoring and large creditors	29

5.4. Board models	31
5.5. Executive compensation models	33
5.6. Multi-constituency models	35
6. Comparative perspectives and debates	41
6.1. Comparative systems	42
6.2. Views expressed in corporate governance principles and codes	47
6.3. Other views	49
7. Empirical evidence and practice	49
7.1. Takeovers	50
7.2. Large investors	59
7.3. Minority shareholder action	67
7.4. Boards	71
7.5. Executive compensation and careers	73
7.6. Multiple constituencies	80
8. Conclusion	82
References	86

Chapter 2

Agency, Information and Corporate Investment

JEREMY C. STEIN

111

Abstract

113

Keywords

113

1. Introduction

114

1.1. Scope of the essay: what's covered and what's left out

115

1.2. Organization

116

Part A. Investment at the firm level

116

2. Theoretical building blocks: investment at the firm level

116

2.1. Models of costly external finance

116

2.2. The agency conflict between managers and outside stockholders

120

2.3. Investment decisions when stock prices deviate from fundamentals

126

3. Evidence on investment at the firm level

127

3.1. Financial slack and investment

127

3.2. Direct evidence of agency-related overinvestment

130

3.3. Evidence on reputational models of investment

131

4. Macroeconomic implications

133

4.1. The financial accelerator

133

4.2. When banks face financing frictions

134

* 4.3. Cross-country differences in financial development, investment and growth

135

Part B. Investment inside

firms

136

5. Theoretical work on internal capital allocation

136

5.1. Fundamental differences between internal and external capital markets

137

5.2. Implications for the efficiency of capital allocation

140

5.3. How information and agency problems shape firms' capital budgeting practices

145

6. Empirical work on internal capital allocation	145
6.1. The value consequences of diversification	145
6.2. Evidence on investment at the divisional and plant level	147
7. Conclusions: implications for the boundaries of the firm	152
References	155

Chapter 3

Corporate Investment Policy	
MICHAEL J. BRENNAN	167
Abstract	168
Keywords	168
1. Introduction	169
2. The objective of the firm and the net-present-value rule	171
3. Valuation by discounting	175
3.1. Multi-factor asset pricing models	178
3.2. The capital asset pricing model	179
4. Practical approaches to estimating discount rates	180
4.1. Estimating equity discount rates in practice	180
4.2. From firm cost of equity to firm cost of capital	188
4.3. Performance of CAPM-based valuations	191
4.4. From firm cost of capital to project cost of capital	192
5. The certainty equivalent approach to valuation	194
5.1. The basic theory of martingale pricing	196
5.2. Estimating risk-adjusted drifts	197
5.3. Some real options	203
6. Summary	208
References	209

Chapter 4

Financing of Corporations	
STEWART C. MYERS	215
Abstract	216
Keywords	216
1. Introduction	217
1.1. Theories of optimal financing	217
2. The Modigliani-Miller value-irrelevance propositions	218
3. The trade-off theory	221
3.1. Taxes	222
3.2. Direct costs of financial distress	226
3.3. Indirect costs of financial distress - conflicts between creditors and stockholders	226
3.4. Other indirect costs of financial distress	228
3.5. Evidence on costs of financial distress	229
3.6. Leverage and product markets	229
3.7. Evidence for the trade-off theory	230

3.8. Target-adjustment models	231
3.9. Computational models	232
4. The pecking-order theory	233
4.1. Debt vs. equity in the pecking order	234
4.2. What's wrong with the pecking order as theory?	236
4.3. Pecking order vs. the trade-off theory - time-series tests	237
4.4. Further tests of the trade-off and pecking-order theories	238
5. Agency theories of capital structure	239
5.1. Jensen and Meckling's pecking order	240
5.2. Free cash flow, leveraged buyouts and restructurings	242
5.3. Is there a general free-cash-flow theory of capital structure?	243
6. What next?	243
6.1. Compensation and incentives	244
6.2. Human capital and financing	245
6.3. Exporting capital-structure theory	246
References	247

Chapter 5

Investment Banking and Securities Issuance

JAY R. RITTER

255

Abstract

256

Keywords

256

1. Introduction	257
1.1. Overview	257
1.2. A brief history of investment banking and securities regulation	259
1.3. The information conveyed by investment and financing activities	261
2. Seasoned equity offerings (SEOs)	263
2.1. Announcement effects	263
2.2. Evidence on long-run performance	265
2.3. Reasons for underperformance	271
3. Short-run and long-run reactions to corporate financing activities	274
4. Initial public offerings (IPOs)	279
4.1. Overview	279
4.2. Short-run underpricing of IPOs	281
4.3. Alternative mechanisms for pricing and allocating securities	281
4.4. Explanations of underpricing	286
4.5. Underwriter compensation	291
4.6. Stabilization activities	292
4.7. Hot-issue markets	293
4.8. Market activity across countries	294
4.9. Long-run performance	295
5. Summary	299
References	300

Chapter 6

Financial Innovation

PETER TUFANO

307

Abstract

308

Keywords

308

1. Introduction

309

2. What is financial innovation?

310

3. Why do financial innovations arise? What functions do they serve?

313

3.1. Inherently incomplete markets stimulate innovation

314

3.2. Inherent agency concerns and information asymmetries stimulate innovation

315

3.3. Transaction, search or marketing costs stimulate innovation

317

3.4. Taxes and regulation stimulate innovation

318

3.5. Increasing globalization and perceptions of risk stimulate innovation

320

3.6. Technological shocks stimulate innovation

321

4. Who innovates? The identities of and private returns to innovators

324

5. The impact of financial innovation on society

327

6. Issues on the horizon: patenting and intellectual property

329

7. Summary

331

References

331

Chapter 7

Payout Policy

FRANKLIN ALLEN and RONI MICHAELY

337

Abstract

339

Keywords

339

1. Introduction

340

2. Some empirical observations on payout policies

342

3. The Miller-Modigliani dividend irrelevance proposition

351

4. How should we measure payout?

354

5. Taxes

358

5.1. Static models

359

5.2. Dynamic models

368

5.3. Dividends and taxes - conclusions

376

6. Asymmetric information and incomplete contracts - theory

377

6.1. Signaling and adverse selection models

377

6.2. Incomplete contracts - agency models

383

7. Empirical evidence

386

7.1. Asymmetric information and signaling models

386

7.2. Agency models

396

8. Transaction costs and other explanations

399

9. Repurchases

404

9.1. The mechanics and some stylized facts

404

9.2. Theories of repurchases

407

9.3. Repurchases compared to dividends	408
9.4. Empirical evidence	410
9.5. Summary	419
10. Concluding remarks	420
References	422

Chapter 8

Financial Intermediation

GARY GORTON and ANDREW WINTON

431

Abstract

432

Keywords

432

1. Introduction

433

2. The existence of financial intermediaries

437

2.1. Empirical evidence on bank uniqueness

437

2.2. Banks as delegated monitors

440

2.3. Banks as information producers

444

2.4. Banks as consumption smoothers

448

2.5. Banks as liquidity providers

453

2.6. Banks as commitment mechanisms

456

2.7. Empirical tests of bank-existence theories

458

2.8. Bonds versus loans

459

2.9. Banks versus stock markets

461

3. Interactions between banks and borrowers

462

3.1. Dynamic relationships and the pros and cons of bank monitoring

463

3.2. Monitoring and loan structure

469

3.3. Beyond lending: equity stakes, board seats, and monitoring

474

3.4. Banking sector structure and lending

479

3.5. Credit cycles and the effect of bank funding on lending

490

4. Banking panics and the stability of banking systems

494

4.1. Definitions of banking panics and the relation of panics to the business cycle

495

4.2. Panics and the industrial organization of the banking industry

499

4.3. Private bank coalitions

501

4.4. Are banks inherently flawed institutions?

503,

4.5. Information-based theories of panics

505

4.6. Other panic theories

507

4.7. Tests of panic theories

508

i 4.8. The banking crises during the Great Depression

511

4.9. Contagion

516

5. Bank regulation, deposit insurance, capital requirements

518

5.1. The origins of government bank regulation and government deposit insurance

519

5.2. Deposit insurance and moral hazard

520

5.3. Corporate governance in banks and the moral hazard argument

526

5.4. Bank capital requirements

529

5.5. Other issues	532
6. Conclusion	532
References	534

Chapter 9

Market Microstructure	
HANS R. STOLL	553
Abstract	555
Keywords	555
1. Introduction	556
2. Markets, traders and the trading process	557
2.1. Types of markets	557
2.2. Types of orders	558
2.3. Types of traders	559
2.4. Rules of precedence	560
2.5. The trading process	561
3. Microstructure theory - determinants of the bid-ask spread	562
3.1. Inventory risk	563
3.2. Free-trading option	566
3.3. Adverse selection	566
4. Short-run price behavior and market microstructure	567
4.1. A model of short-term price behavior	568
4.2. The realized spread	569
4.3. Serial covariance of price changes	570
5. Evidence on the bid-ask spread and its sources	572
5.1. The spread and its components	572
5.2. Cross-section evidence	575
6. Price effects of trading	577
6.1. Block trading	577
6.2. Herding	578
6.3. Other studies of the effects of trading	579
7. Market design	579
7.1. Call-auction markets	580
7.2. Dealer versus auction markets: the Nasdaq controversy	583
7.3. Other issues in market design	586
8. The market for markets: centralization versus fragmentation of trading	589
8.1. Evolution of equities markets in the USA	589
8.2. Global markets	592
8.3. Economic forces of centralization and fragmentation	593
8.4. The future structure of markets	595
9. Other markets	595
9.1. Bond market	596
9.2. Currency market	596

9.3. Futures markets	597
9.4. Options markets	597
10. Asset pricing and market microstructure	598
11. Conclusions	598
References	600
Subject Index	1-1
