**Organisation** XVII

## Volume 1 Maritime transportation

### 1. Vessels for maritime transportation

#### 1.1 Hydrodynamics

- HSC route monitoring for wake wash analysis in the bay of Naples  
  *E. Begovic, G. Benassai, E. Nocerino & A. Scamardella*  
  
- Planing hull hydrodynamics. A critical review of the state of the art in theoretical resistance assessment  
  *C. Bertorello & L. Oliviero*  
  
- On the hydroelastic response of two chemical tanker ships in irregular head waves  
  *L. Domnisoru, D. Dragomir & A. Ioan*  
  
- Hydrodynamics characteristics for pitching and heaving of trimaran  
  *G. V. Egorov & V. I. Tonyuk*  
  
- Ship hydrodynamics and optimal control during two-way traffic - A proposed system of navigation in Suez Canal  
  *M. M. Gaafary & M. Molesh*  
  
- On powering performance testing of ships with azimuth thruster propulsion  
  *S. Georgiev & S. Kyulevchev*  
  
- Motion responses and wave loads of a bulk carrier in waves  
  *Y. Inoue & M. Kamrusszaman*  
  
- A Study on motion responses of a mega container ship in seaways  
  *Y. Inoue & I. Nozue*  
  
- Drift of containers in waves  
  *M. Le Boulluec, B. Forest & B. Gaurier*  
  
- Hydrodynamics of ship-like sections in heave, sway and roll motions using RANS  
  *A. B. G. Quérard, P. Temarel & S. R. Turnock*  
  
- A note on a simplified model of ship yawing in steep following seas  
  *K. J. Spyrou*  
  
- Dynamics of lashed trailers on board ships under the combined effect of roll and pitch motions  
  *P. Poulios, N. Themelis & K. J. Spyrou*  
  
- Evaluation of slamming loads on a wedge-shaped section at different heel angles adopting SPH and RANSE Methods  
  *M. Viviani, S. Brizzolara & L. Savio*  
  
- Radiation and diffraction problems for a ship going in deep water under regular head waves  
  *Y. L. Vorobyov & A. V. Demidjuk*

</tbody>
</table>
Estimation of bias error by modal testing of mechanical vibrating structures
*S.I. Petkov, D.A. Dichev & Chr.C. Koev*

277

Ships transverse frame - Structural system reliability based on FEM
*M. Shahid & P.K. Das*

285

Scaling of impact on glass-polyester laminated plates
*L.S. Sutherland & C. Guedes Soares*

293

Bending moment measurement in case of non-uniform temperatures distribution
*M.T. Tsenkov*

301

An application of Response Surface Method for reliability analysis of composite structure
*N. Yang, P.K. Das & X. Yao*

309

Fatigue design assessment based on pseudo excitation method
*L. Yu & P.K. Das*

315

### 1.3 Machinery and propulsion systems

Design of the propulsive system for the life cycle of the ship at given sea state conditions
*J. Kostova & Z. Aleksiev*

325

Real-time simulation of a COGAG naval ship propulsion system
*M. Altosole, G. Benvenuto, M. Figari & U. Campora*

331

Most effective techniques for minimizing the noise emissions on shipboard
*A.K. Çigek & İ.D. Er*

339

The effect of biodiesel on exhaust emission characteristics of a diesel engine
*E. Dobrucah, R.U. Ozcumah & S. Ergin*

345

A study on exhaust emissions reduction system for marine diesel engines
*S. Ergin*

351

Fuzzy control of a ship propulsion system
*M.H. Ghaemi*

357

Noise problems in ship - Do we still hear them?
*P. Hdkkinen*

367

An experimental and theoretical study on two-layer vibration isolation of a diesel generating set in an oil tanker
*F. Hu, J. Yang & Q. Zhong*

373

Non-contact torque measurement of the ship’s shaft-lines
*V. Milkov, R. Arsenov & D. Dishev*

379

Diesel engine exhaust gas system - A review of recent problems with clogging, fouling and corrosion
*A. Munir & P. Hdkkinen*

387

Investigation on propulsive alternatives for fluvial convoys adapted to the transport of ethanol and oil derivatives in the Tiete-Parana waterway
*N.N. Pereira & H.L. Brinati*

395

### 1.4 Systems design

Stability criteria at one-time trip of ship
*G. V. Egorov, M.A. Kutynikov & IE Davydov*

405

Substantiation of parametric line of dry-cargo ships of restricted navigation area
*G. V. Egorov, LA. Ilnitskyy, V.I. Tonyuk & N. VAvtutov*

411
Implementation of metamodels in ship design
P.G. Georgiev

A new step in on-board computer software design
I. Rakitin, T. Georgiev & V. Rakitin

Multidisciplinary optimization of a catamaran's hydrofoil design with dynamic response surface and distributive processing
T.P. Tancredi, O.B. Augusto & F. Bennis

Design environment for structural design: Application to modern multideck ships
V. Zanic, J. Andric & P. Prebeg

1.5 Shipyard technology maintenance and repair

An implementation model proposal for integrating technological developments into the shipbuilding processes
M. Celik & I.D. Er

ISO 1400:2004 implementation plan model for shipyard organizations
Z. Er

New approach for shipyard pipe production line optimisation
N. Fafandjele, R. Rubeša & V. Simone

Influence of plasma cutting methods on the quality of ship hull details and welded constructions
V.V. Kvasnytskyy, G.V. Egorov, Z.G. Goloborod'ko, V.F. Kvasnytskyy & A.M. Pototnya

Prediction of a transverse shrinkage of butt welded joints
B.G. Metschkow & T. Urbański

Key factors for increasing of the competitiveness of Lithuanian shipbuilding industry
R. Mickeviciene, L. Turkina & A. Zukauskaite

Cost competitive position oriented shipyard's developing approach
A. Naghib, A.M. Rashwan & M.M. El-Gammal

Series effect in measuring shipbuilding output and productivity
F. Fires, C. Souza & T. Lamb

2 Maritime transportation and port operations

2.1 Maritime transportation

Contribution margin model applied to the marketing planning of a Container Liner Carrier
G.A.A. Costa, M. A. Brinati & CM. Hino

Study of competitiveness and critical factors of success in Brazilian maritime industry
D.A. Mourn, R.C. Botter & A.ESilva

The implementation of the fuzzy logic elements in the area of the transport system operation quality assessment
L. Muślewski

POLARIS, a decision support system for maritime policy and management
N. Nikitakos & G. Fikaris

A study on the evolution of second-hand market of tankers during the years 2004-2007
Ch.N. Stefanakos, D. V. Lyridis & P.G. Zacharioudakis
Proposal for Trans-European Transport Network integration with Turkish transport network

F Tiirker & I.D. Er

2.2 Short-sea shipping

Towards an applicable efficient multimodal transport system in Egypt

M. Haiba, H. Leheta, A. Elhewy & S. Youssef

On a pusher-barge system for use in the Midwest coast of Korean peninsula

Diagnosis of Brazilian short-sea shipping and its main obstacles

D.A. Mourn, R.C. Botter & A.C. Medina

Study on technological developments applied to cabotage navigation

N.N. Pereira, M.M.C. Araçao, G.B. Nosralla, L.M. Chies & R.C. Botter

Development and demonstration of an integrated methodology for the design of RoRo-Passenger ships for the needs of short sea shipping in Greece

G. Zaraphonitis, A. Papanikolaou, T. Loukakis, N.G. Tsouvalis, S. Skoupas, K. Mitsotakis & A. Antoniou

2.3 Terminal operations and logistics

Multiple criteria evaluation for developing of competitive strategies on Turkish container ports

M. Celik AI.D.Er

Effects to OIL, LPG ships and their loading arms under meteorological conditions in terminals of Durres and Vlora

K.N. Lapa & A.U. Goga

Analysis of rules for the berthing of ships in container terminals

M. Patricio & R.C. Botter

Construction of container handling simulation model in container terminal by database analysis

T. Shinoda, T. Tanaka & H. Kim

Proactive safety and security concern on maritime LNG transportation

F. Tiirker & I.D. Er

Author index

Volume 2 Exploitation of ocean and coastal resources

3 Marine environment

Parametric bispectra of wind waves in the coastal zone

N.K. Andreeva & Z.I. Cherneva

Wave-current systems in variable bathymetry regions

K.A. Belibassakis, Th. Gerostathis & G.A. Athanassoulis

The POLCOMS-WAM wave-current interaction model: Development and performance in the NW Mediterranean

R. Bollattos, P. Osuna, J. Wolf, J. Monbaliu & A. Sanchez-Arcilla

Experimental and numerical analysis of steep wave groups

G.F. Clauss, F. Stempinski & M. Klein

Spatial and temporal evolution of nonlinear wave groups

B. Dorfman & L. Shemer
Video image-based technique for measuring wave field evolution in a laboratory wave tank
B. Dorman & L. Shemer

Coastal monitoring programme in the Gulf of Manfredonia (Southern Adriatic Sea): Preliminary results
F. Fiesoletti, F. Spagnoli & A. Specchiutti

Oceanographic parameters for mucilage monitoring program in the Northern Adriatic Sea
F. Grilli, E. Paschini & M. Marini

Monitoring of the impact of Muuga Port activities on fish communities and fishery in Muuga Bay in 1994-2006
A. Järvik, T. Raid, T. Drevs, L. Järv & A. Jaanus

Morphodynamical analysis of the beach "Aheloj - Pomorie Spit" and possibilities for its sustainable development
H. Nikolov, S. Keremedchiev, E. V. Trifonova & A. Nikolova

Bulgarian Black Sea monitoring programme
A. Palazov, H. Slabakov & H. Stanchev

Galata platform weather and seastate observing system
A. Palazov, H. Slabakov & A. Stefanov

Geoid modeling for the Black Sea and future prospects
L. Pashova & I. Yovev

Introducing Free Surface Scanning, an optical, non-contact technique for recording the deformed free surface in towing tank
S.G. Perissakis, G.J. Grigoropoulos & D.E. Liarokapis

Statistical properties of steepness and asymmetry of shallow water waves
P.G. Petrova, Z.I. Chernueva & C. Guedes Soares

Development of a wave prediction system for the Madeira archipelago
E. Rusu, P. Pilar & C. Guedes Soares

Modelling of the wave-current interactions in Tagus estuary
L. Rusu & C. Guedes Soares

Fluctuations of energy flux of waves
Ya. V. Saprykina & S. Yu. Kuznetsov

Wind and wave extremes in the Eastern Mediterranean Sea
Ch.N. Stefanakos, T.H. Soukissian & M. Hatzinaki

Data management in offshore real-time monitoring
A. Stefanov, A. Palazov & H. Slabakov

Modelling of bottom profile evolution due to extreme coastal events
E. V. Trifonova

Modeling long term distribution of mean wave direction
J.L. Vega & G. Rodriguez

4 Offshore installations

A numerical investigation on the risers-induced-damping phenomenon
I.K. Chatjigeorgiou

Loads and motion of the deep-sea ROV modus
G.F. Clauss, F. Stempinski & M. Hieronymi
Flow around and forces on a circular cylinder with helical grooves
S. Huang

Underwater vehicle motion control based on information on seawater parameters
S.L. Karlinsky, V.O. Mrykin & A.N. Pinegin

Experimental study of the heave added mass and damping of solid and perforated disks close to the free surface
B. Molin, F. Remy & T. Rippol

DP-Assisted floating production vessels, an environmental solution to well testing
G.D. Saldivar

Studies on the motion of a moored floating body
I. Strat, I.C. Matulea, E. Rusu & B. Ionita

Conceptual design of a multi purpose semi submersible
K.S. Varyani & L. Moldestad

Wave and current induced force coefficients for horizontally submerged rectangular cylinders
V. Venugopal & K.S. Varyani

5 Fisheries and aquaculture

Simulation of bottom trawl fishing gears. A simplified physical model
A. Folch, J. Prat, J. Antonijuan, A. Manuel, A. Sala & F. Sardd

Development of small sampling gear for the operation by small ship
M. Ishizaki, Y. Inoue, K. Ebata, M.S. Koo & T. Kumazawa

Development of a design and simulation tool for the moored underwater flexible system

Cod-end dynamics in response to a range of dynamic pressure loadings
EG. O'Neill & R.D. Neilson

Modelling axi-symmetric cod-ends made of different mesh types
D. Priour, B. Herrmann & E.G. O'Neill

Some questions of numerical and physical modelling of fishing gears
M.M. Rozenshtein, A.A. Nedostup, S.V. Popov & T.Vermakova

Energy saving trawl in Mediterranean demersal fisheries
A. Sala, A. Lucchetti, V. Palumbo & K. Hansen

Hydrodynamics of contact of marine larvae with a solid
G. Zilman, J. Novak & Y. Benayahu

6 Nautical activities

A multipurpose floating structure as an attractor for coastal leisure activities
M.L. Bianchini & S. Ragonese

Parametric evaluation of the effective breadth for GRP beams with FEM calculation
D. Boote

Free surface and air flow simulation of a 30-foot yacht
C. Ciortan & C. Guedes Soares

Rational design of boats using composite materials
D. Dragomir, L. Domnisoru & A. Ioan
Constitutive behaviour analysis for a boatbuilding ferro-cement with "super mortar"  
V. Hreniuc, G. Kiimbetlian & M. Modiga  

Investigation of Turkish cruise tourism potential  
M. Kadioglu  

Computational study on the influence of the camber of a main sail in upwind condition  
P. Lopes, C. Ciortan & C. Guedes Soares  

Fuzzy multi-objective model of the sailing yacht skipper decision making during the storm conditions  
M. Pajk  

Recreational craft design and development strategy for Adriatic market  
N. Subašić & D. Lončarić  

7 Maritime safety & environmental protection  

7.1 Maritime safety  

Full ship handling simulation scenarios for safety assessment in Port of Constantza  
E. Barsan, P. Arsenie & R. Hanzu-Pazara  

Human performance in maritime industry  
P. Bocanete, R. Hanzu-Pazara & I. Pana  

The use of risk concept to characterize and select High Risk Vessels  
T. Degrè  

On safety of ship systems in variable operation conditions  
P. Dziula, M. Jurdzinski, K. Kolowrocki & J. Soszynska  

On multi-state approach to ship systems safety analysis  
P. Dziula, M. Jurdzinski, K. Kolowrocki & J. Soszynska  

Navigational risk assessment in optimization of LNG terminal parameters  
M. Gucma  

Establishment of shore based emergency response center in Varna  
P.N. Kolev, P.I. Nikolov, P.G. Georgiev, M.T. Tsenkov & D. Dimitrov  

Safety indexes designed for vessel traffic: A case study of the western ports and waterways in Shenzhen  

Virtual reality original instrument employed in crises management  
E. Oanta  

The analysis and the assessment of the means of transport repair efficiency influence on their reliability level  
M. Woropay, A. Wdzięczny, L. Musleivski & A. Piątak  

Navigation safety assessment in an entrance channel, based on real experiments  
P. Zalewski & J. Montewka  

7.2 Environmental protection  

Relational gap analysis for the existing and modified MARPOL annex II requirements  
O. Arslan & D. Er  

Optimisation of naval technology for the application of an oil-spill combating technique  
K.A. Belibassakis, G.K. Chatzikonstantis & Y.G. Georgiou  

XII
Modelling and assessment of Ferries' environmental impact: A case study

M. Borlenghi, M. Figari, I.S. Carvalho & C. Guedes Soares

An investigation about the influence of ship size on the environmental performances of oil tankers

P. Gualeni, A. Bruzzo, F. Delia Volpe & A. Coraddu

Evaluation of oil spills in the Baltic Sea by means of simulation model and statistical data

L. Gucma

Oil spill modeling and combat

M. Perkovic & A. Sitkov

Decision support system for the combat of oil pollution at sea in continental Portuguese Economic Exclusive Zone

R. Sd, D. Pulquério & C. Guedes Soares
