Contents

Preface ..................................................................................................................................................... vii

1. Introduction
   Haskel J. Greenfield ................................................................................................................................. 1

Part I: Other ways of thinking about secondary products

2A. Some reflections on the origins and intensification of dairying in the archaeological record
    Haskel J. Greenfield ................................................................................................................................. 20

2B. And the last shall be first
    Pat Shipman ........................................................................................................................................... 40

Part II: Zooarchaeology, artefacts, and secondary products

3A. The exploitation of domestic animal products from the Late Neolithic Age to the Early Bronze Age in the heartland of ancient China
    Zhipeng Li, Roderick B. Campbell, Katherine R. Brunson, Jie Yang, and Yang Tao ......................... 56

3B. Assessing the archaeological data for wool-bearing sheep during the Middle to Late Neolithic at Bronocice, Poland
    Marie-Lorraine Pipes, Janusz Kruk, and Sarunas Milisauskas .......................................................... 80

3C. Primary or Secondary Products?: The nature of Capra and Ovis exploitation within the Chalcolithic and Bronze Age levels at Portalón site (Atapuerca Hill, Burgos, Spain)
    María Ángeles Galindo-Pellicena, José Miguel Carretero, and Juan Luis Arsuaga ......................... 103

Part III: Methodological issues in the application of zooarchaeological harvest profiles and other methods to the study of secondary products

4A. ‘Crying over spilt milk’: an evaluation of recent models, methods, and techniques on the origins of milking during the Neolithic of the Old World
    Haskel J. Greenfield and Elizabeth R. Arnold ....................................................................................... 130

Appendix 4.1: Distribution of cattle (mandibles and loose teeth) by age classes (NISP)
Appendix 4.2: Source data for corrected domestic cattle age percentage distributions (corrected NISP) displayed in Figure 4.2
Appendix 4.3: Distribution of ovicaprines (mandibles and loose teeth) by age classes (NISP)
Appendix 4.4: Source data for corrected domestic Ovis and Capra and combined Ovis/Capra age percentage distributions (corrected NISP) displayed in Figure 4.3
Appendix 4.5: Distribution of pig remains (mandibles and loose teeth) by age classes (NISP)
Appendix 4.6: Source data for corrected domestic pig age percentage distributions (corrected NISP) displayed in Figure 4.4
Appendix 4.7. Summary of pig data from Greenfield (1988a)
Appendix 4.8: Summary of cattle data from Greenfield (1988a)
Appendix 4.9: Summary of ovicaprine data from Greenfield (1988a)
Appendix 4.10: Summary of Ovis and Capra data

4B. The Secondary Products Revolution, mortality profiles, and practice of zooarchaeology
Arkadiusz Marciniak ..............................................................................................................186

4C. The Second Revolution of Secondary Products: Do mortality profiles reflect herd management or specialised production?
Aharon Sasson and Haskel J. Greenfield ............................................................................206

Part IV: Other indicators of secondary products exploitation

5A. ...Til the cows come home: the Secondary Products Revolution and Mesopotamian art in the 3rd millennium BCE
Trudy S. Kawami ................................................................................................................220

5B. The Secondary Products Revolution in light of textual evidence from Kültepe-Kanesh, central Turkey
Levent Atici ..........................................................................................................................233

5C. Herd mobility and secondary product exploitation in eastern Hungary during the Neolithic and Copper Age: strontium isotope analysis from zooarchaeological samples
Julia I. Giblin .........................................................................................................................253

Part V: Zooarchaeological analysis of remains from Vinča-Belo Brdo

6A. The origins of secondary product exploitation and the zooarchaeology of the Late Neolithic, Eneolithic, and Middle Bronze Ages at Vinča-Belo Brdo, Serbia: the 1982 excavations
Haskel J. Greenfield .............................................................................................................274
Appendix 6.1: Distribution of body sections by taxon and period (NISP)
Appendix 6.2: Frequency distribution of butchered bones by taxon and element (TNF)

6B. Harvest profile and dental cementum analysis of domestic taxa from Late Neolithic and Middle Bronze Age Vinča-Belo Brdo: some thoughts on subsistence and seasonality
Haskel J. Greenfield and Elizabeth R. Arnold .....................................................................335
Appendix 6.3: Cementum analysis measurements used in the analysis
Appendix 6.4: List of measurements. All abbreviations follow von den Driesch 1976...........CD
Appendix 6.5: Raw data from zooarchaeological analysis of Vinča Belo-Brdo excavations used in analysis. Yellow highlights are revised data columns .........................................................CD
Appendix 6.6: Inventory of photographs of special bone and bone artefacts from the 1982 Vinča-Belo Brdo excavations ............................................................... CD
